Ahmedabad, India

## Objective

I am a computer engineering student focused on becoming a full stack web developer. I enjoy building interactive and user-friendly websites, and I am constantly learning new technologies to improve my skills.

## Education

### SAL Engineering & Technical Institute

B.E. in Computer Engineering

Relevant Courses: OOP (Java), DBMS, Data Structures and Algorithms

Ahmedabad, India

Jun 2023 – Jun 2027 (Expected)

Minors in Data Science

Jan 2025 – Jun 2027 (Expected)

## Skills

**Programming Languages:** C, Java, Python, HTML, CSS, JavaScript

**Web Development:** HTML, CSS, JavaScript, Node.js, Express.js, Tailwind CSS, Bootstrap

**Databases:** MySQL, Oracle

**Tools & Software:** Git, GitHub, VS Code, Jupyter Notebook

**Data Science Libraries:** NumPy, Pandas, Matplotlib, SciPy

## Projects

### YapTalk – Real-time Chat App

[Live](#) — [GitHub](#)

- Built a real-time chat application using Socket.io and vanilla JavaScript.
- Users can join chat and exchange messages in real time.
- Deployed the application on Render for seamless online access and live testing.
- Designed responsive layout for both desktop and mobile.

### Simon Says Game

[Live](#) — [GitHub](#)

- Created a memory-based game with color buttons and sound effects.
- Implements increasing difficulty as user progresses.
- Designed responsive layout for both desktop and mobile.

### Snake Game

[Live](#) — [GitHub](#)

- Classic snake game built using HTML, CSS, and JavaScript.
- Features grid movement and score tracking.
- Designed responsive layout for both desktop and mobile.

### Personal Todo App

[Live](#) — [GitHub](#)

- Created a dynamic to-do list to add, delete, and mark tasks.
- Includes a drag-and-drop toggle feature to easily rearrange tasks for better organization and workflow.
- Designed with clean UI and responsive layout for usability.
